MANAGEMENT SYSTEM POLICY

Vilardell Purtí, company specializing in the manufacture of precision turned components, is committed to develop an SGI policy considering Quality, Environment and Prevention of occupational risks, operating always in the most professional ethics.

Management undertakes the responsibility to meet with the applicable requirements (legal, reglementary and others) and the continuous improvement of the "SGI". For this reason, management undertakes to provide all necessary human and material resources to carry out the activities satisfactorily and productively:

- Technology of leading production in our sector.
- Means of control totally aligned with the productive technologies.
- Continuous training of all personnel.

QUALITY

Quality is a key element in the competitiveness, profitability of the company and for the satisfaction of our customers.

Quality is a common task, where the responsibility and involvement of each person in the organization are essential to reach the total quality.

Customer service is understood as an essential parameter of quality management, and it will be given the treatment that corresponds to a strategic element of the relationship with our customers.

Communication, information and participation are key elements for all staff to be involved in the project of producing quality instead of controlling it.

Produce products with "0" defects is the goal that defines and summarizes our company or "SGI" policy.

ENVIRONMENT

Any activity of the company will take as a firm commitment, in the first instance, the protection of the nearest environment, but also the most global environmental protection. The Management will promote, through environmental prevention, the minimization of the environmental impacts associated with each environmental aspect. Specifically, they will promote among others, the rational use of natural resources, the saving of water, energy, raw materials and the prevention of pollution, generating opportunities, contributing to the sustainability and balance between society and the environment.

All personnel will be trained and informed in the application of good environmental practices. Main principles of respectful industrial activity in the environment will be promoted to third parties.

PREVENTION OF LABOR RISKS

All activities of the company will be taken into account in the prevention of their occupational risk.
The legal requirements in the field of occupational risk prevention will be fulfilled.
Individual and collective means will be used to ensure the workplace safety, promoting at all times the principle of preventive action.

"SGI" policy is available to all interested parts.
